

1- Download Multi-factor application called Authy

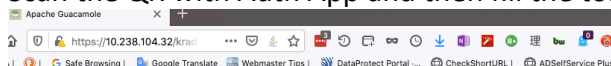

2- Connect to USJ VPN

3- Access this URL: <https://10.238.104.32/kradolf/>

4- Login with your RSN SSO

5- Scan the QR with Auth App and then fill the token in

Multi-factor authentication has been enabled on your account.

To complete the enrollment process, scan the barcode below with the two-factor authentication app on your phone or device.

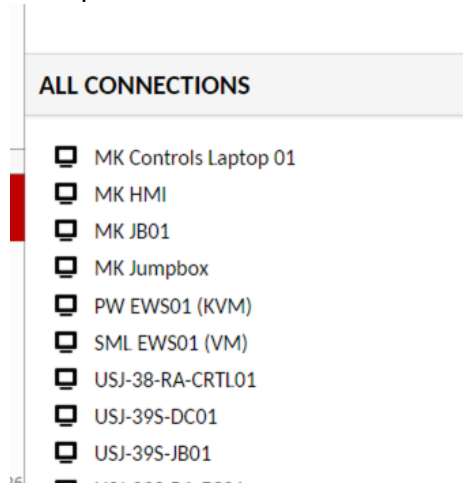

► Details: [Show](#)

After scanning the barcode, enter the 8-digit authentication code displayed to verify that enrollment was successful.

Continue

- 6- After that you will be able to login and you will be able to see the list of remote access VMs you are allowed to access. – One click on the name – then RDP will open (imbedded in the web browser).

Example:

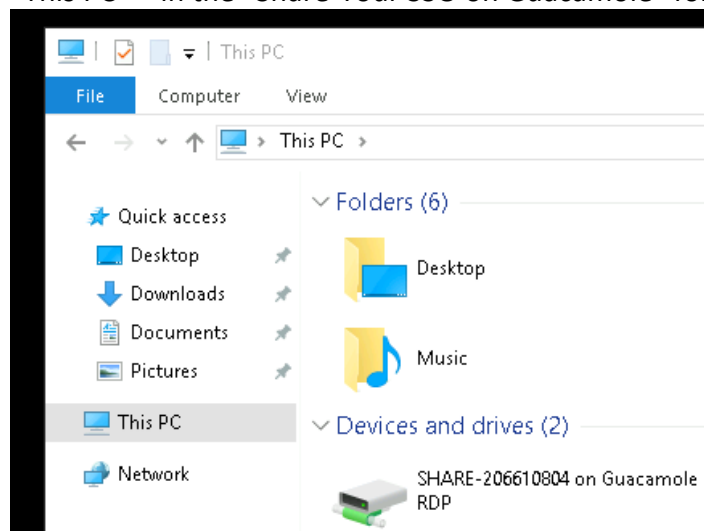

- 7- Note: if someone else is logged in, you will see this message:

*Currently in use by 1 user.*

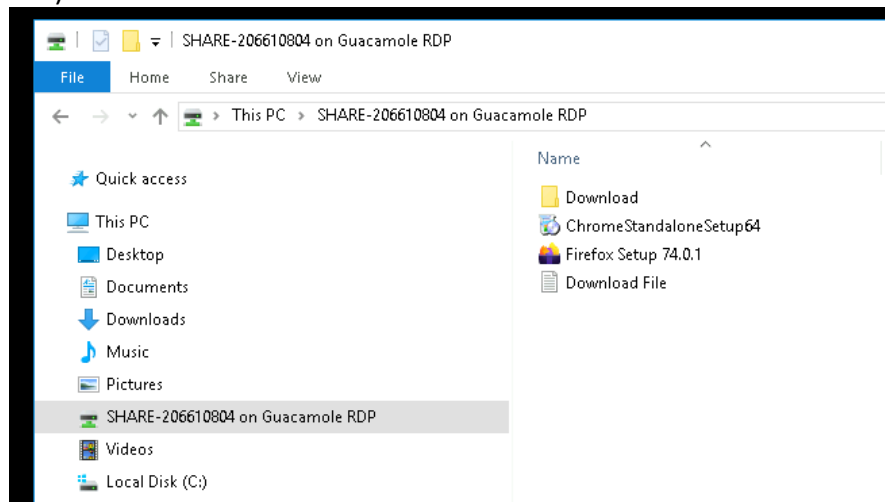

Try to access the VM with no one in. every VM will allow 2 concurrent connection.

- 8- Note: you can drag and drop files to the open session, then you can find the files in "This PC" – in the "Share-Your SSO on Guacamole" folder

If drag and drop is not working press "Ctrl+ALT+shift" then click on "Share Drive"

- 9- To download a file from VM to your laptop
- Place the file in the shared folder (in the “This PC” inside the remote access VM).

- “Ctrl+ALT+shift” then “Shard Drive” then double click on the file you want to download (it will download like any file you download from Internet).
